EDUCATION

2026 Claude Professional Certification (Chat, Code, Cowork, MS Office), Anthropic

2026 AI Champion, internal AI Fluency programme (Level 4), Cognizant

2025 Microsoft Certified: Power BI Data Analyst Associate, Microsoft

2023 Microsoft Power BI Data Analyst Professional Certificate, Microsoft

2023 Google Data Analytics Professional Certificate, Google

2022 Data Science Bootcamp, Pragmatic Institute

2021 Python courses, University of Michigan

2020 Business Strategy and Development, Budapest University of Economics and Business

PROFESSIONAL EXPERIENCE

2023.12 - PRESENT

@ Cognizant – Legal Operations · Business Planning & Reporting Senior Associate · Data & AI Enablement

- Serve as the go-to expert for automation, Power BI and AI, advising D+ level stakeholders across multiple divisions
- Own internal AI adoption: present Claude to teams through live demos, build reusable assets and write setup guides so colleagues can replicate the workflow
- Own AI tool pilots end-to-end: onboard vendors, support cost and security assessments, manage the pilot team, lead communications, training and Q&A, build the SharePoint hub and documentation and deliver post-pilot material for executives
- Build automations that remove manual work: Power Automate flows for email capture and filing; automated AI agent email responder; Python driven leadership communications; full financial workflow automation
- Lead UATs for AI implementation projects under the Legal Director
- Author training and enablement material for contract management and legal tech platforms, from role specific user guides and knowledge check assessments to SOPs, KT packages and refreshed SharePoint sites, backed by stakeholder training sessions and office hours
- Lead end-to-end Power BI projects: gather business needs, define technical requirements and deliver tailored reporting solutions covering licensing, workspaces, security and data governance
- Design cost, headcount, forecast and budget vs actuals reporting for leadership, translating complex business requirements into clean DAX logic and audience specific views
- Architect and optimize legacy and cross-departmental Power BI reports using scalable schema models, advanced DAX and M, applying time intelligence, virtual tables, drillthrough, measure branching, dynamic measure switching, field parameters and AI insights

Biggest achievements:

Reached AI Champion level in internal dashboard and completed Claude certification across Chat, Code, Cowork and MS Office.

Resolved over 100 issues during an UAT cycle and routed recurring support patterns into the SOP and knowledge management library.

Revived legacy projects with no training or documentation by reverse engineering the underlying data models.

Designed a financial mapping solution that cut processing time by 90% and halved overall workload.

2023.07 - 2023.09

@ iubenda (SaaS startup) – Junior Data Scientist

- Analyze marketing and sales funnels to improve conversion and retention, building user journey datasets from integrated CRM and web analytics
- Run churn and retention analysis, A/B testing, customer segmentation, hypothesis testing and predictive modeling, supporting budgeting, forecasting and revenue recognition

Biggest achievement:

Introduced unique Python optimizations to reduce the runtime of MySQL queries by 99%.

2022.08 - 2023.07

@ NGENA (Tech startup) – Reporting & Business Intelligence Specialist

- Act as sole owner of the company reporting system: resolve issues, manage admin, gather requirements, write user manuals and train colleagues
- Launch new dashboards for market research, use cases, scenarios and prototypes while proactively owning existing reports, BI tools and IT solutions
- Partner with leadership to define data requirements, advise the evolution of controlling frameworks for a fast-growing company and build ad-hoc enhancements in VBA, SQL and Python (Pandas, NumPy, Matplotlib, SciPy)

Biggest achievement:

Developed new performance indicators by aligning stakeholders, creating data warehouses and building ETL pipelines.

2020.02 - 2022.08

@ bp (SSC) – Financial Planning & Analysis Controller (FP&A)

- Own reporting across all divisions on MoM/YoY movements, forecast vs. actual variances and KPI reports
- Submit B2B & B2C related financial reports into the ERP system (IFRS compliance)
- Gather and standardize data streams from various functions
- Model and evaluate cost bases and proactively identify opportunities and efficiencies
- Prepare ad-hoc reports to ensure mutual understanding of all accounting entries and implement them into the recurring reports
- Work as a key person between auditors and stakeholders: reconcile and verify GL entries, provide evidence for material changes, and help assure financial reports meet internal and external controls

Biggest achievement:

Introduced a new implementation for the widely used Management Reporting System which reduced workload by 60% across Europe.

2018.07 - 2019.12

@ Samsung (Tech) – Controlling Trainee

- Track, inspect and approve commission fees and discounts, resolving calculation discrepancies with divisions
- Track global headcount and FTE, analyze plan, actual vs budget figures and manage KPI reporting
- Calculate and report accruals and reconcile invoices against SAP production data

Biggest achievement:

Built a global report to standardize the fragmented financial reports of license trading between subsidiaries, resulting in a 10 workday reduction for two licensing colleagues.

2017.02 - 2018.06

@ IT Services Hungary (Tech) – Controlling Trainee

- Assist Business Operations with diverse payroll related reports and forecasts
- Develop VBA automations

2016.11 - 2017.01

@ Vodafone (Telco) – SEPA Business Operations Student

- Track and report daily sales
- Create ad-hoc reports explaining variances and anomalies

SKILLS

- **BI and Data:** Power BI, Power BI Service, Power BI REST API, Microsoft Fabric, advanced DAX, M, Power Query, Power Pivot, semantic models, XMLA, data warehousing, ETL
- **Programming and Automation:** Python (Pandas, NumPy, Matplotlib, SciPy), SQL, VBA, Power Automate, Power Apps, workflow automation
- **AI:** AI adoption and enablement, AI pilot delivery, prompt engineering, agent workflows, Claude, Copilot, Anthropic API, Copilot Studio, RAG
- **Legal Tech and Contract Management:** Icertis CLM, contract authoring workflows
- **Finance and Systems:** SAP, Jedox, Ascent, BigQuery, Analysis for Office, BEx Analyzer, ODBC connector, IFRS reporting, Microsoft 365
- **Analytics and Product:** Google Analytics, Heap.io, Funnel.io, HubSpot
- **Ways of Working:** JIRA, Git, Asana, ServiceNow
